Reid,

(b)(5) - Deliberative Process Privilege

I could do it but process wise it is probably best to come from the WAM.

Subject: WA 1-04, Task 4 Draft Report

Good morning Brian,

Attached for EPA's review is the draft report for WA 1-04 "Risk Assessment Revision for 40 CFR Part 61 Subpart W – Radon Emissions from Operating Mill Tailings," Task 4

"Detailed Risk Estimates". There are two events that are beyond SC&A's control which may cause the dose/risk estimates to change:

(b)(5) - Deliberative Process Privilege

2) Last Friday, Mark Neumann of Neutron Energy called me to let me know that Neutron Energy was still considering sending us updated information regarding the Juan Tafoya site. If Neutron Energy does provide us with current site data, the doses/risks for the Western Generic site should be re-calculated.

If either or both of these events occur, SC&A will update the doses/risks in the final version of the report. Also, in the final version of the report, once all of EPA's comments on the draft report have been addressed, SC&A will sign the signature page.

Steve
